WOULD YOU LIKE TO SAVE MONEY THIS SUMMER?

Dear Rainier View Water Customer:

This notice is to serve as a reminder that from May – September, Rainier View Water Company's conservation rate is in effect. **Please be aware that the May read includes usage from your read date in April to your read date in May.** Conservation rates will appear on your June 1st bill as a result of **April/May usage** and will continue through your October 1st bill as a result of **August/September usage.**

Many people mistakenly believe that water conservation is related to drought. In reality, the purpose of conservation (with or without drought) is to implement effective use of water. To discourage the overuse of water, which typically occurs between the months of April – September, a conservation fee is applied for water use in excess of normal consumption standards.

It is extremely important that you plan your household summer conservation program now. This program should include leak detection and repair, such as a Home Water Conservation Kit (*one per household, available at our office*). If you have an automatic sprinkler system, rain sensors would be a good investment. These are just two examples to help you conserve water.

The Conservation rate is based on usage. As approved by the Washington Utilities and Transportation Commission, any excess revenues can only be spent to promote conservation programs or system efficiencies.

- | | |
|--|---------------------------|
| • 0 - 500 cubic feet (including surcharges) | \$ 19.70 Normal Rate |
| • 500 cu. ft. - 3000 cu. ft. per 100 cu. ft. or fraction thereof | \$.85 Normal Rate |
| • Over 3000 cu. ft. per 100 cu. ft. or fraction thereof | \$ 5.00 Conservation Rate |

If your monthly consumption exceeds 3000 cubic feet (or 30 units) this conservation rate will impact you immensely.

For those customers who would like additional conservation information, please visit the web sites listed below or contact us at (253) 537-6634.
